#### **DETAILED ACTION**

1. This action is in response to amendment filed 9/24/2007. Claims 1, 6, 7, 8, 10, 11, 14, 17 and 18 were amended. Claims 4-5, 12-13, and 20-30 are cancelled. Claims 1, 2, 3, 6-11 and 14-19 are pending.

### Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/24/2007 has been entered.

## Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 17-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamilton II, et al. (6,389,539).

As per claim 17, Hamilton discloses: arranging a first non-volatile storage device of a computer system into a plurality of storage regions to store CMOS data, wherein the device lacks hardware security such that some of the storage regions are modifiable by an application program in the system, each of the regions being protected by at least two software schemes including a set of region level rules and another scheme selected from the group consisting of (1) mask bits, (2) checksum, (3) CRC, and (4) encryption (Column 4, Lines 5-27); generating a first integrity metric corresponding to mask bits of valid CMOS content stored in a first region of the first non-volatile storage device; generating a second integrity metric corresponding to encryption of valid CMOS content stored in said first region of the first non-volatile storage device (Column 4, Lines 27-51); storing the first and second integrity metrics in another, second non- volatile storage device of the computer system to later determine when the content in the first region has been modified without authorization (Column 4, Lines 53-Column 5, Line 10).

As per claim 18, rejected as applied to claim 17. Furthermore, Hamilton discloses: comparing a previously stored integrity metric, corresponding to an earlier version of the content stored in the first region, to a newly calculated integrity metric

Application/Control Number:

corresponding to the current content stored in the first region to determine when an unauthorized modification has occurred (Column 4, Lines 27-67).

As per **claim 19**, rejected as applied to claim 18. Furthermore, Hamilton discloses: replacing the content of the first region with an earlier version of the content therein when it is determined that there was an unauthorized modification (Column 4, Lines 53-Column 5, Line 10).

## Allowable Subject Matter

5. Claims 1, 2, 3, 6, 7, 8, 9, 10, 11, 14, 15 and 16 allowed.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saoussen Besrour whose telephone number is 571-272-6547. The examiner can normally be reached on M-F 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
